This book explores all aspects of the "adoption triad," from birth parents to adoptive parents to adoptees. It covers past and modern adoption practices and issues, and is full of real life stories from all parties of the triad. A large portion of this book is dedicated to how adoptees are affected by sealed or open records.

This is a handbook that is also a memoir. In nine chapters, Dischler talks about the birthmother’s road to open adoption, offering to birth families and adoptive families, advice and guidance through various stages of the experience. She also shares the ups and downs of her own story and that of her now adult son.

This session includes discussions about creating a photo resume, networking to locate a birth family, sensitive handling of phone calls, the first meeting, a cooperative agreement to outline future contact, and understanding the process from the birth family's and the adoptive family's perspectives. It also includes what to expect when working with a birth parent with a mental health history and/or drug or alcohol addiction.

For decades, open adoption has been gaining ground, replacing the secrecy and shame once attached to the subject. Examining scores of actual open adoptions, this book focuses, in separate chapters, on infants, preschoolers, school-age children, and teens, showing how love is multiplied and energies are used more productively when family ties are not a mystery.

This book, published by the British Association for Adoption & Fostering (BAAF), examines the way the internet, social networking and other technologies are changing the landscape of adoption contact, search and reunion. It is the first UK guide to explore the many pressing questions and concerns facing adoptive parents: What do adoptive families, adopted children and birth families need to know about adoption in the Facebook age? How can they be equipped for new challenges? What do adoptive parents need to know about protecting privacy and security in the best interest of their children and wider family? How can adoptive parents manage the complex situations that arise from unauthorized and unmediated contact? What help and support is available?

This guide demystifies the technology behind social networking sites, provides a practical explanation of how they work and tackles key issues such as internet safety, privacy and identity protection. Facing up to Facebook provides a considerable amount of information, raises important questions and offers essential advice. Case studies and quotations enable others' experiences to be share, and reveal the potential and very significant risks that some people have experienced. Although it does not provide any easy answers, the guide does include hard-won insights from adoptive parents and adoption workers who have had to face up to the impact of Facebook.

Three households are profiled, two young adults and a sibling pair discuss the varying degrees of openness in their adoptions and its meaning to their lives. One lived with her birthmother for several years and has remained close throughout her adoption. Another has adoptive parents who felt threatened by his desire for openness, and the siblings fall somewhere in between.
This book examines all the ways in which birthparents are marginalized, providing a glimpse of birthparents’ emotional roller coaster ride as they struggle with grief, ambivalence and regret. It makes the persuasive case that adopted children are best served when birthparents and adoptive parents work together to ensure that the birthparents remain part of their children’s lives.

This book, based on interviews with more than one hundred adopted children; birth and adoptive parents; extended families; professionals, and experts; helps both adoptive and birth parents address their fears and concerns, while offering them the support to put the child’s psychological and spiritual needs at the center of adoption.

This abridged version of the book, "The Open Adoption Experience", read by the authors, will help adoptive and birth parents know what to expect as the relationship unfolds.

This book offers a detailed discussion of the many advantages of open adoption as well as the common problems, helping adoptive and birth parents to know what to expect as the relationship unfolds and how other families have coped with the unexpected.

This workshop draws from the experiences of families who have been in long-term open adoptions for 15 to 25 years. Challenges presented involve the simpler ones of managing visits and communication among numerous birth families to the more complex issues of divorce, drugs, death, prison, and more. The speakers encourage sharing of audience experiences.

Presented by Terri Kirby, adoptive parent, Lisa Rankins, birth mother, Jennifer Gerrits of the Saint John Adoptive Parents Association, New Brunswick, and Michelle Gerrits, adoptee, New Brunswick at the 37th NACAC Conference 2011 in Denver, Colorado. This workshop profiles two families’ open adoption experiences. A birth mother and the woman who adopted her son will share their journey, which began on opposite sides of a courtroom. They developed a strong bond and learned about love, trust, patience, and understanding. In the second story, a parent and an adopted teen share how they gradually opened an adoption from foster care. The presentation will include practical information for parents considering connecting with their children's birth family.

For professionals and laypersons alike, this book provides a comprehensive review of the issues involved in openness in adoption. It also provides rich data from an exceptional sample of adoptees, their adoptive parents, and their birth mothers, and it provides a perspective on the experience of each of these members of the adoption triad.

A panel discussion focuses on sensitive, life-altering decisions about contact with birth parents, siblings, extended birth families and foster parents. Topics include: defining the range of openness, the developmental needs of children and adoptive families, what kids are thinking vs. what they are talking about.

### Respect, Responsibility, and Commitment in Open Adoptions (Audiotape)

**Author:** Audiotape  
**Material Title:** Audiotapes  
**Publication Year:** 2002

Open adoption is most often presented to prospective birth and adoptive parents in terms of “doing whatever they are comfortable with.” What this approach rarely does, however, is take into consideration the needs and desires of the adopted child. This workshop discusses why respect, responsibility, and commitment need to replace comfort if the child is truly to be served in open adoption.

### Social networking and contact: How social workers can help adoptive families

**Author:** Eileen Fursland  
**Material Title:** Books  
**Publication Year:** 2010  
**Pages:** 102

This book, published by the British Association for Adoption & Fostering (BAAF), examines the way internet, social networking and other technologies are changing the landscape of adoption contact, search and reunion. It is the first UK guide to explore the many pressing questions and concerns facing social workers: What do practitioners need to know about adoption in the Facebook age? How can they be equipped for new challenges? What do social workers need to know about protecting privacy and security so that they can give advice to young people and their families? How can social workers manage the complex situations that arise from unauthorized and unmediated contact? What advice and support is available?

The guide demystifies the technology behind social networking sites, provides a practical explanation of how they work and tackles key issues such as internet safety, privacy and identity protection. It examines the challenges faced by all parties involved in contact and looks at balancing the adopted child's curiosity and need to know with the adoptive family's fears and concerns around security and disruption. Social networking and contact provides a significant amount of information, raises important questions and offers essential advice. Case studies and quotations enable others' experiences to be shared, and reveal the potential and very significant risks that some people have experienced. Although it does not provide any easy answers, the guide does include hard-won insights from adoption workers and adoptive parents who have had to face up to the impact of Facebook.

### Social networking and you

**Author:** Eileen Fursland  
**Material Title:** Children's Books  
**Publication Year:** 2011  
**Pages:** 24

This booklet for adopted and long-term fostered teenagers raises important questions about young people's use of social networking and offers practical advice on sharing information (or not) and staying safe online. It specifically addresses concerns about unexpected contact with birth family members, talking things through with adoptive parents and tracing birth relatives. The real-life experiences of adopted young people help bring the guide to life and challenge the reader to consider 'what happened next?'
Adoptive parents, birth parents, and adoptees come together in a spirit of extended family that helps the participants overcome the fear, pain, shame, and loss of adoption with honor and respect. Using as groundwork the profound insights of contemporary thinkers in the fields of adoption, theology, philosophy, and literature, Gritter guides the reader along a spiritual pathway that discovers the honesty, community, and cooperation that produce successful open adoption.

With eloquence and conviction, more than thirty birth mothers, adoptive mothers and adopted daughters explore what is a deeply emotional, sometimes controversial and always compelling experience that affects millions of families and individuals. These personal essays and stories are informed by the contemporary adoption movement and raise timely issues that illustrate its complexity, among them: open and closed adoption, cross-cultural adoption, the birth record debate, the experience of biracial adoptees, adoption by lesbian couples, and the search for identity.
