This 21-minute animated video introduces the topic of Fetal Alcohol Spectrum Disorders (FASD) and demonstrates key strategies that have been proven to help students who experience brain-based disorders become more successful in school and in life. Scenarios depicted in this video represent both secondary and elementary situations. Join Mario as he talks about what it is like to live with an FASD. Mario collects all of the 8 Magic Keys with the support of friends, educators, and his family.

This presentation is designed for parents to give to teachers to help them be more sensitive to the needs of adopted children and to consider adoptive family issues when designing lesson plans and assignments.

Completely frank and remarkably compassionate, this detailed, comprehensive guide is designed to be used by adoption professionals and adoptive parents, to help them get started, keep going, and locate whatever additional information and support they need. It covers such key topics as how to manage finances, advocate within the educational system, and cope when things go wrong. Tables, checklists, and frequent references to additional resources add value to this informed advice to adoptive parents.

This book, from "Families Adopting In Response," addresses a wide range of school situations faced by adoptive families including parent-teacher communication, transcultural considerations, Special Education, graduation, older child adoption, and more.

The first chapter introduces us to five young people with different “kinds of minds” (Attention Deficit, Reading Disorder, Memory Problems, Language Disorder, Social and Motor Skills Problems). The next five chapters each highlight, anecdotally, one of those kids, showing how his or her mind works. The final chapter provides practical information and techniques for children and the adults who work with them, in each of the categories mentioned.

This guidebook is designed to help teachers, counselors and administratos to work cooperatively with parents of ADHD students to identify and address the problems that school presents. Topics include Communicating of students’ progress through daily reports; Assisting with medication; Improving students’ self-esteem; Improving study skills; Homework problems; and others.

"Ayuda para Billy" es un manual pragmático que ayuda a guiar a las familias y a los educadores que están trabajando con niños que han enfrentado el trauma. El libro por Heather Forbes, basado en los conceptos de la neurociencia de las emociones y el comportamiento, provee estrategias lógicas, comprensivas, y detalladas para educadores y padres. Este libro es fácil de leer y explica y ayuda a comprender la verdadera naturaleza en cuanto a las experiencias que afectan el cerebro y el aprendizaje. Es un libro vital para cualquier persona que trabaja con niños en la sala de la escuela.

"Help for Billy" is a pragmatic manual to help guide families and educators who are struggling with traumatized children. Based on the concept of the neuroscience of emotions and behavior, Heather Forbes provides detailed, comprehensive, and logical strategies for teachers and parents. This easy to read book, with tables, outlines and lists, clears the way for a better understanding of the true nature regarding traumatic experiences affecting the brain and learning. It is a must read for anyone working with a child in the classroom.

<tr>
<td>Today millions of kids are stuck in a world that doesn't respect, support, or embrace who they really are—these are what Deborah Reber is calling the &quot;differently wired&quot; kids, the one in five children with ADHD, dyslexia, Asperger's, giftedness, anxiety, sensory processing disorder, and other neurodifferences. Their challenges are many. But for the parents who love them, the challenges are just as hard—struggling to find the right school, the right therapist, the right parenting group while feeling isolated and harboring endless internal doubts about what's normal, what's not, and how to handle it all.</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>But now there's hope. Written by Deborah Reber, a bestselling author and mother in the midst of an eye-opening journey with her son who is twice exceptional (he has ADHD, Asperger's, and is highly gifted), Differently Wired is a how-to, a manifesto, a book of wise advice, and the best kind of been-there, done-that companion.</td>

<td><strong>Guide to Collaboration for IEP Teams, A</strong></td>
<td>Nicholas Martin</td>
<td>Books</td>
<td>2005</td>
<td>240 pages</td>
</tr>
<tr>
<td>Under federal law, public school personnel are expected to work with parents as a team to design, review, and modify Individualized Education Programs (IEPs) for children designated as having special education needs. While this applies to roughly 10% of all children enrolled in public schools, few of these team participants have received adequate training. With so many complex, challenging, and emotionally charged decisions involved, participating in an IEP meeting can seem like navigating through a minefield. But now there's a practical guide to managing these meetings with a high level of awareness, safety, and confidence. This skills-based book will help administrators, teachers, resource professionals, and parents work as a unified team to design, review, and modify IEPs for children with special education needs. This resource fully addresses effective meeting management, negotiation, the emotional side, and conflict prevention. Written in a user-friendly and conversational style, this much-needed book is supplemented with checklists, outlines, diagrams, and specific examples to make the complex simple. Incorporating the feedback and suggestions of hundreds of special education professionals, this book will be invaluable in creating the best possible IEPs.</td>

In this 4-disc collection, Heather guides viewers through her trauma-informed model and brings her book, Help For Billy, to life through roleplays, video clips, anecdotes from her years of professional experience, and open Q&A from the audience. Her multi-media presentation along with her light and humorous presentation style makes this DVD not only educational to watch but fun and entertaining.

Heather’s trauma-informed approach to meeting the educational needs of our most challenging students (who Heather affectionately refers to the "Billys" of the classroom) will help you understand why students do the things they do from a developmental trauma perspective. Yet more importantly, you will be given the tools you need in order to help the Billys of your school or classroom work through their trauma in a safe, communicative, and caring way so they can reach their full academic potential. This DVD set will restore your hope that there is a way to help your trauma-impacted students. It will also equip and empower you to become your very best when facing the challenges the "Billys" of your classroom present to you on a daily basis.

Bringing up a special child can leave parents feeling deskilled, disarmed, and worn down. A resilient child has the ability to cope with challenging situations, and the capacity to bounce back from trauma and gain long-term strength from these life experiences.

Resilient Therapy™ is an innovative way of strengthening children with complex needs. This is a tried-and-tested handbook for parents to read from cover to cover, or dip in and out of as needed. Accessible and fun, Helping Children with Complex Needs Bounce Back includes exercises and worksheets, as well as breaking down the principles of the latest research, making them easy to apply to everyday situations.

This ‘magic box’ of ideas and remedies is perfect for parents and carers, friends and families of children with disabilities, special educational needs, and mental or physical health needs, as well as professionals working with these children.

This book discusses ways educational bureaucracies work—or more importantly, don’t work—for children with special needs. It offers "must-do's" and "must don'ts" in advocating for your child; strategies on how to prepare for an IEP meeting; what to do when children don't get crucial services; and how to avoid due process.

Learn how to prepare for IEP meetings, create legally correct and educationally sound IEPs, ensure access to the general curriculum, track educational progress, and form effective parent-school partnerships. Features more than 100 tips to help parents, teachers and administrators share goals and develop healthy working relationships.

Drawing on three decades of experience in residential schools, Lavoie provides strategies for teaching friendship skills in the classroom, home and community for children age 6 through 17 with learning disabilities. He explores the causes and consequences of "social incompetence," then offers field-tested advice on how to help children work through daily social struggles and go from being picked on and isolated to becoming accepted and involved.

"Es mucho trabajo ser tu amigo: Ayudando a los niños con incapacidades de aprendizaje a encontrar el éxito social"
### Keeping A Head in School: A Young Student’s Book About Learning Abilities and Disorders*

**Author:** Mel Levine  
**Material Title:** (Children’s Materials)  
**Books**  
**Publication Year:** 1990  
**Pages:** 279

This student’s book about learning abilities and learning disorders, written for adolescents and pre-adolescents, should appeal also to older and younger students. It attempts to empower students with learning disorders to advocate for themselves, to see themselves as resilient beings, to use adults effectively as resources, to deploy their strengths, and to preserve and cherish their own individuality.

### Learning Disabilities and Your Child

**Author:** Lawrence Greene  
**Material Title:** Books  
**Publication Year:** 1983  
**Pages:** 286

This “Survival Handbook” explains how to diagnose learning disabilities ranging from dyslexia and hyperactivity to language disorders and tuning out. It offers helpful advice on choosing the right school or program for your child and on getting the support you need. Anecdotes, where parents and children speak out, as well as step-by-step programs that you can begin right now, make this unique book a vital guide for parents and teachers of learning disabled children.

### Learning How to Learn: Getting into and Surviving College when you have a Learning Disability

**Author:** Joyanne Cobb  
**Material Title:** Books  
**Publication Year:** 2003  
**Pages:** 138

Written for high school and college students with learning disabilities, this thorough practical manual steers students through the process of preparing for college, choosing the right school, and succeeding academically.

### Middle School Years, The: Achieving the Best Education for Your Child Grades 5-8

**Author:** Michelle A. Hernandez  
**Material Title:** Books  
**Publication Year:** 2000  
**Pages:** 187

This is a handbook to help parents of Middle Schoolers help their children through the social pressures and escalating schoolwork that characterize this crucial and challenging time in their lives.

### Motivating the Uncooperative Student: A Guidebook for School Counselors

**Author:** John Taylor  
**Material Title:** Books  
**Publication Year:** 1990  
**Pages:** 44

This booklet is designed to help school counselors, teachers, administrators and mental health professionals to identify and remediate the resistive student. Strategies are included for those students with physical conditions that slow learning (such as ADD), attitudinal problems, rebellious natures, etc.

### Multiple Intelligences: The Theory in Practice

**Author:** Howard Gardner  
**Material Title:** Books  
**Publication Year:** 1993  
**Pages:** 252

This book brings together previously published and original work by Gardner and his colleagues at Project Zero to provide a coherent picture of what we have learned about the educational applications of MI theory from projects in schools and formal research over the last decade.

### Neurodiversity in the Classroom: Strength-Based Strategies to Help Students with Special Needs Succeed in School and Life

**Author:** Thomas Armstrong  
**Material Title:** Books  
**Publication Year:** 2012  
**Pages:** 184

A new concept on human diversity has emerged over the past 10 years that promises to revolutionize the way educators provide services to students with special needs: neurodiversity. Just as we celebrate diversity in nature and cultures, so too do we need to honor the diversity of brains among our students who learn, think, and behave differently. In Neurodiversity in the Classroom, best-selling author Thomas Armstrong argues that we should embrace the strengths of such neurodiverse students to help them and their neurotypical peers thrive in school and beyond.

This innovative book focuses on five categories of special needs: learning disabilities, attention deficit hyperactivity disorder, autism, intellectual disabilities, and emotional and behavioral disorders. For each category, Armstrong provides an in-depth discussion of

* The positive attributes associated with that category,
* Acclaimed neurodiverse adults who have excelled in their chosen fields,
* Computer programs and applications that allow students with special needs to overcome obstacles and achieve success,
* Rich networks of human resources both inside and outside of school that educators can draw upon to support the social and emotional lives of neurodiverse students,
* Innovative learning strategies that are tailored to each student’s unique strengths,
* Future career paths for which a student’s particular gifts might be a good fit,
* Modifications in the school environment that allow for seamless inclusion of neurodiverse students in the regular classroom, and
* Timely information about how to integrate the strategies and assessments for each category with the Common Core State Standards.

It’s time that we focused on celebrating rather than pathologizing our students with special needs so that they can fully realize their potential in school and life. This practical and thought-provoking book will inspire teachers and administrators everywhere to make sure that all students with special needs get the support and strength-based instruction they deserve.
A new approach to help kids with ADHD and LD succeed in and outside the classroom
This groundbreaking book addresses the consequences of the unabated stress associated with Learning disabilities and ADHD and the toxic, deleterious impact of this stress on kids' academic learning, social skills, behavior, and efficient brain functioning. Schultz draws upon three decades of work as a neuropsychologist, teacher educator, and school consultant to address this gap. This book can help change the way parents and teachers think about why kids with LD and ADHD find school and homework so toxic. It will also offer an abundant supply of practical, understandable strategies that have been shown to reduce stress at school and at home.

Offers a new way to look at why kids with ADHD/LD struggle at school
Provides effective strategies to reduce stress in kids with ADHD and LD
Includes helpful rating scales, checklists, and printable charts to use at school and home
This important resource is written by a faculty member of Harvard Medical School in the Department of Psychiatry and former classroom teacher.

This book, though published in 1996, a year before important changes to the Individuals with Disabilities Education Act (IDEA), contains many practical tips for working with your child and her or his school to get the best for your child from birth through transition to adulthood.

In addition to information on IDEA and 504 law and types of evaluations, this easily understood, practical guide includes chapters on parent-teacher communication and school meetings, coping with stress, building your child's self-esteem and increasing social competence. 73 pages of Appendixes include sample 504 plans, IEP forms, behavior charts, procedural safeguards, helpful resources, and more.

If you are a student, you are likely excited about having a job and earning money! You may have questions about school and other services available to help you plan for your transition from school to work and adult life. This transition guide is for students with disabilities and their families to help navigate services and community resources on the path from school to work.

This booklet is designed as a quick reference manual for school counselors, educators, school administrators, and mental health professionals. It features step-by-step guidelines for identifying and counterering twelve common destructive parenting styles.

From the fourth-grade girl who never gets invited to a birthday party because classmates think she’s "weird", to the geek who is terrific at math but is failing every other subject, quirky children are different from other kids in ways that they – and their parents – have a hard time understanding. They present a host of challenges that standard parenting books fail to address. Seasoned pediatricians Perri Klass and Eileen Costello provide expert guidance that families with quirky children so desperately need. Illuminating the confusing list of terms often applied to quirky children - from Asperger’s Syndrome and "nonverbal learning disability" to "obsessive-compulsive behavior” and Sensory Integration Dysfunction, the authors also discuss various therapy options, coping strategies, and available medications. Most of all, they will help quirky kids lead rich, fulfilling lives at home, at school, even on the playground.

Disk 2 DVD includes the following presentations from the Raising Resilient Rascals Takes Flight! 2010 Conference: "Understanding and Building Childhood Executive Functioning,” presented by Gwen A. Lewis, Ph.D, A.B.Pd.N; "Enhancing Executive Function,” presented by Julia M. Bledsoe, MD; "Panel Discussion: Advocating for your child's school needs."
**Read-Aloud Handbook, The**
*Jim Trelease*

This book tells you why, how, when, and what to read aloud to your children. The why (it helps your kid, helps your relationship with your kid, and it’s fun) is reason enough to make a habit of it. The “how” includes a list of do’s, don’ts, tips on luring kids away from TV, etc. When? Now! The what includes a 104 page list of recommended read-aloud books (not all good books are ideal for reading aloud) based on type, topic, and age level.

**Right-Brained Children in a Left-Brained World: Unlocking the Potential of your ADD Child**
*Jeffrey Freed, M.A.T., and Laurie Parsons*

For children living with Attention Deficit Disorder (ADD), life can be frustrating. They may find it impossible to sit quietly, focus on a task, or work well with others; they often have difficulty mastering even basic skills. But there is more to ADD than deficits. Jeffrey Freed, who works exclusively with ADD and gifted children, has developed a simple, easy-to-apply program that works with the special abilities of the ADD child. Freed and coauthor Laurie Parsons explain how, in as little as ten minutes a day you can: test for a right-brained learning style; help your ADD child master spelling – and build confidence; tap your child’s speed-reading abilities; and win over teachers and principals to the right-brained approach the ADD child thrives on.

**School Years, The: Fetal Alcohol Syndrome Series (VHS)**
*Altschul Group*

This program concentrates on the importance of meeting the needs of children with F.A.S. at both the classroom and school district levels. It stresses that students with F.A.S. or F.A.E. are not necessarily mentally retarded but may process information differently. Practical ways of helping these children learn despite their differences are presented. Parents, teachers and other experts offer their views on the importance of getting to know the child’s teachers and educating them about the child’s needs. Useful for parents and teachers alike.

**Smart Moves: Why Learning Is Not All In Your Head**
*Carla Hannaford, PhD*

The body’s role in thinking and learning is presented in a readable format, thoroughly supported by scientific research. Hannaford, a neurophysiologist and educator, tells us why we must move and shows us how to move to fully activate our learning potential. Her insights will be of immediate value to learners of all ages, from the gifted to the so-called learning-disabled.

*Chuck Levine, et Al.*

This booklet, photocopied by ORPARC with permission from Oregon Advocacy Center, is an effective tool for examining the rights of people with difficulties in school. It focuses on IDEA law but also has information on Section 504 provisions. It is written by attorneys and advocates in plain, easy to understand language and could be helpful in showing school personnel what services you are entitled to.

**Students Like Me: Teaching Children with Fetal Alcohol Syndrome (VHS)**
*Gary Fisher, Phd and Rhoda Cummings, EdD*

This video gives elementary and special education teachers a clear understanding of what Fetal Alcohol Syndrome is, how it affects children’s learning and behavior, and what can be done to modify classroom environments and teaching methods to allow children with FAS to learn.

**Succeeding Against the Odds: How the Learning Disabled Can Realize Their Promise**
*Sally Liberman Smith*

This book delivers hope and guidance to anyone whose life has been challenged by a learning disability. Blending more than 25 years of personal experience and accounts of success from people with learning problems, the author has created a practical and compassionate guide for the learning-disabled and their relatives, teachers, and friends.

**Survival Guide for Kids with LD (Learning Differences), The* (Children's Materials)**
*Gary Fisher, Phd and Rhoda Cummings, EdD*

What is LD? Why do some kids have LD? Why is it hard for kids with LD to learn? Why do other kids sometimes tease kids with LD? What happens when kids with LD get out of school? If you are a kid with LD, you may have lots of questions like these. This book has many answers. It can help you understand LD better. It can also help you understand yourself better.

**Teachers Ask About Sensory Integration (CD)**
*Belle Curve Records*

This tape and accompanying 42-page booklet with reproducible checklists is for you to share with any teacher willing to make an attempt to understand why problems in sensory integration affect learning, to learn useful strategies for helping these kids engage and focus, and to improve the educational and social performance of kids with SI challenges.
This guide provides teachers with the latest information on the diagnosis and treatment of ADD and how to effectively intervene in the classroom, with students and with their parents. Sophisticated brain imaging studies highlight the biological nature of ADD and provide insights into effective interventions. Specific brain-based strategies are given to help ADD students be more effective every day.

This book explores the different sources of formal and informal support available to parents with children who have all types of disabilities. Includes information on organizations, legal rights, special education, recreational activities, day care, and many other topics.

Richard D. Lavoie leads a group of parents, educators, psychologists, and children through a series of exercises that cause frustration, anxiety, and tension; feelings all too familiar to children with learning disabilities. By dramatizing the classroom experience so vividly, Lavoie lets us see the world through the eyes of a child. Later, participants discuss strategies for working more effectively with learning disabled children.

This book is a compilation of true stories about children with FAS. The stories are clustered by subjects such as, The Joy of Creativity, Physical Fear Without Fear, Dealing with Stress, Extroverted Children, The Issue of "Lying," and Teaching Strategies.

Taking readers inside the classroom of today's 1st, 2nd, and 3rd graders--and inside the minds of the teachers--this guide shows parents how they can help make their child's learning environment an exciting place where children become thinkers, problem-solvers and self-directed learners.

This book discusses the issues of parents with children struggling with Learning Differences. In clear, understandable language, the authors explain: five types of LD; some possible causes and early signs of LD; ways your child's LD can affect your child's social and emotional well-being, and your family harmony; your child's legal rights – and your rights as a parents of a child with LD; how to advocate for your child, work with the school, and get help outside of school, and more.

This is a hopeful and practical outline of suggestions for helping children prenatally affected by alcohol. Intended for parents, teachers and any professional working with kids, it is supportive of caregivers and clearly cherishes the children in the process. The video comes with a booklet that offers tips and further advice on working more successfully with these children.
This is a hopeful and practical outline of suggestions for helping children prenatally affected by alcohol. Intended for parents, teachers and any professional working with kids, it is supportive of caregivers and clearly cherishes the children in the process. The video comes with a booklet that offers tips and further advice on working more successfully with these children.

This book from Wrightslaw (see www.wrightslaw.com) teaches you how to plan, prepare, organize -- and get quality special education services. You learn about organizing your child’s file, devising a master plan for your child’s special education, roles of experts, writing smart IEP goals, and much more. Appendixes list information on hundreds of information groups, state departments of education, and legal and advocacy. It includes dozens of worksheets, forms, and sample letters that you can tailor to your needs. (Includes 118 pages of appendixes.)

This “Complete Reference to Special Education Legal Rights and Responsibilities” shows you what the law says about IEP requirements and IEP teams, evaluations, reevaluations, and independent evaluations, rights and responsibilities of parents and schools, and much more. NOTE: The entire text of this CD ROM is also available as a book of the same title.

Part I: About Goals & Objectives (measurability, vagueness / specificity) Part II: Writing Goals & Objectives (present levels, writing goals & objectives, writing measurable goals & objectives, how to project annual goals, how to move the child’s performance to the goal, how to put PLOP, Objectives / Benchmarks, Goals in the IEP). Part III: Sample PLOPs, Objectives, Goals (includes 75 samples for children with various disabilities)
